

## Economic Overview And Outlook: North Carolina

### JOBS

- Including December, the private sector has gained jobs nationwide for 46 consecutive months.
- In North Carolina, private sector employment fell by 9.7 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 8.3 percent.
- In North Carolina, employees in the construction, manufacturing, and mining sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in North Carolina have experienced the greatest employment increases: professional and business services; leisure and hospitality; and trade, transportation and utilities.\*
- As the recovery continues to take hold, service-providing industries are projected to add the most jobs between 2012 and 2022. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and leisure and hospitality sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries.

### EMPLOYMENT

- The unemployment rate in North Carolina was 6.9 percent in December 2013, up 1.9 percentage points from December 2007, but down from its most recent peak of 11.3 percent in February 2010.
- 323,000 residents were counted among the unemployed in North Carolina during December 2013.
- In North Carolina, initial claims for unemployment insurance benefits totaled 27,563 during December, up 14.0 percent from the previous month. Since peaking at 141,997 in March 2009, initial claims for unemployment insurance benefits have declined by 80.6 percent.

### EARNINGS

- Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 3.0 percent. Most recently, in the 3rd quarter of 2013, total personal income is 6.6 percent above its 4th quarter of 2007 level.

- Real per capita personal income (in 2009 \$) in North Carolina was \$35,998.70 in the 3rd quarter of 2013, up from \$35,007.20 in the 3rd quarter of 2011.

### HOUSING

- After peaking in the first quarter of 2007, national home prices declined by 18.1 percent over 17 quarters. Between the second quarter of 2011 and the third quarter of 2013, the most recent quarter, national home prices rose by 5.9 percent.
- In North Carolina, home prices fell by 12.5 percent over 17 quarters from their peak in the first quarter of 2008. Since the second quarter of 2012, home prices in North Carolina have risen by 2.7 percent.
- As of the 3rd quarter of 2013, 1.9 percent of all mortgages, including 6.9 percent of subprime mortgages, were in foreclosure in North Carolina.
- Housing starts in North Carolina totaled 56,060 units (seasonally adjusted annual rate) in December 2013, a decrease of 4.0 percent from November.
- Within the South census region, which includes North Carolina, sales of new single-family homes totaled 230,000 units in December 2013, a decrease of 7.3 percent from November. Sales of existing single-family homes increased 4.7 percent to 1,780,000 units (at seasonally adjusted annual rates) from November to December 2013.

## How Does North Carolina Compare To Other States?

Workers across the country were hard hit during the recent recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare North Carolina to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within North Carolina since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in North Carolina.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.

### STATE QUICK FACTS

		North Carolina	United States
<b>Unemployment Rates</b> .....	December 2010	10.5%	9.4%
	December 2011	9.8%	8.5%
	December 2012	9.4%	7.9%
